

NOTICE

Stage 2 Water Restrictions are in effect for all Granite Shoals Water Customers As of 25 August 2011-- until further notice

Stage two restrictions (moderate water shortage conditions)

Goal: Achieve a thirty (30) percent reduction in water demand

These water-use restrictions are **mandatory** for all retail water customers:

- **Limit watering landscaped areas to a twice-a-week watering schedule.** See landscape watering schedule.
- **Limit outdoor watering** to midnight and 10 a.m. and from 7 p.m. to midnight on designated watering days. There are exceptions for new landscapes. During the first 10 days after installation, you may water once a day; for day 11 through 20, once every other day; and for day 21 through 30, once every third day.
- **Do not wash motor vehicles**, motorbikes, boats and other vehicles except during these hours on your designated watering days. Only use a bucket or hand-held hose equipped with a shutoff nozzle. (Exception: Commercial car washes, service stations and vehicles such as garbage trucks and those used to transport food and perishables.)
- **Limit filling or refilling indoor or outdoor swimming pools**, wading pools or Jacuzzi-type pools except on designated watering days and during designated watering hours.
- **Don't operate ornamental fountains or ponds** unless it is necessary to support aquatic life or the ponds are equipped with a re-circulation system.
- **Limit water use from hydrants to fire fighting and related activities.** Exception is possible for construction purposes if a special permit is obtained from Granite Shoals water utility system.
- **Limit irrigation of golf course fairways** to designated outdoor water use days and between hours of midnight and 10 a.m. and between 7 p.m. and midnight. Exception: Irrigation of golf course greens and tees is allowed every other day if a plan is filed and approved by Granite Shoals. These restrictions don't apply if the golf course uses an alternate water supply, such as reclaimed water, rainwater or gray water.
- **Restaurants are urged to serve water to patrons only upon request.**
- **Do not wash down sidewalks**, walkways, driveways and other hard-surfaced areas.
- **Do not wash down buildings** or other structures for anything other than immediate fire protection.
- **Repair all leaks as soon as possible**, including broken irrigation or sprinkler heads, leaking valves or leaking faucets.
